

Recycle your Old or Gently Used Sneakers

The PQ Garden Club is doing a **SNEAKER DRIVE** to help the environment and to help many of those people who live without anything on their feet.

Did You Know - In the US, about 200 MILLION sneakers are thrown away every year.

Worn out sneakers can be recycled into something new. Donating to this recycling drive will keep sneakers out of the landfill.

Did You Know - There are as many as 600 million people in the world living without shoes.

Donating gently used sneakers can help those in need who can't afford to buy their own shoes.

Please donate your unwanted sneakers, no matter how worn out, to one of the two bins that are located in the front hallway and in the gym hallway at PQ Elementary School.
